

CAN YOU EAT LESS THAN 10 GRAMS OF PROTEIN IN A DAY?

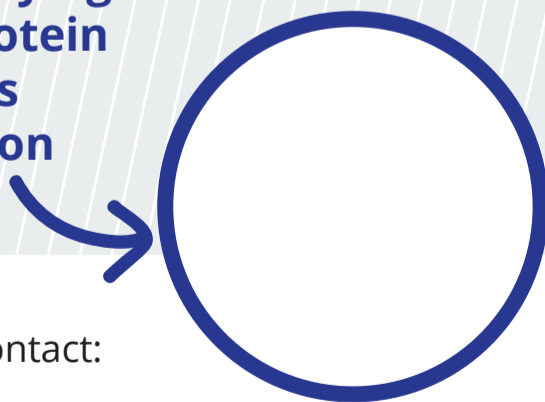

Join other dietitians from around the country
and PLAY your protein for a day.

The Great Protein Dietitians Challenge
is where dietitians come together in teams to take on
eating less than 10 grams of protein for a day –
all in the name of raising awareness and supporting people
living with rare genetic metabolic (protein) disorders.

Join our team and take on the challenge
for just one day this February.
